

Nothing Beats A  Bally®

Proven Dependable

For over 75 years Bally has been providing the commercial and institutional markets refrigeration products worldwide. From standard walk-in coolers and freezers, blast chillers, and modular structures to large refrigerated buildings, Bally provides non ozone-depleting insulated urethane panels backed with a 10 year warranty on panel construction. A qualified team of expert factory representatives and inside sales personnel follows your product from consultation to construction.

Let Bally handle all your refrigeration needs so we can show you that Nothing Beats a Bally!

Discover the benefits of doing business with Bally!

Refrigerated Buildings

- Deliver the maximum in strength, convenience and economy.
- Install quickly & maintenance-free.
- Available in smooth or embossed White G-90 galvanized steel, Galvalume, smooth or embossed stainless steel & embossed sand tan finishes.
- Wide range of refrigeration systems including multi-compressor racks air-cooled and water-cooled condensing units.

Walk-in Coolers and Freezers

- 4", 5" or 6" foamed in place, tongue & groove urethane panels reduce construction and energy costs.
- Over 10,000 designs, with a variety of panel thicknesses, floors and door options.
- Bally Walk-ins are quick to install, easy to relocate and fully expandable.
- EISA compliant.

Northwind Blast Chillers

- Northwind blast chillers process foods quickly and safely through the "danger zone" which minimizes the risk of foodborne bacterial contamination.
- Optional monitoring features let you document safe food preparation practices and satisfy all regulatory reporting requirements.

Modular Structures

- Excellent housing for high-cost equipment—at a very affordable price.
- Secure protection in a controlled environment: perfect for public works, police departments, aerospace, data storage, and many other industries.
- Bally's tough construction is perfect for remote locations and provides secure protection in a wide range of temperatures.

Refrigeration Products

- Complete line of refrigeration products all designed for ease of installation and service.
- Condensing units range from 1/2 to 6 HP with matching evaporators. Hermetic, semi-hermetic, scroll or discus compressors available.
- Low profile evaporators include standard variable speed fan motors for maximum energy efficiency.
- Our BQ Line of quiet condensing units range from 1 thru 6 HP. Variable speed EC motors and new cabinet design provide the most efficient and quiet units available.

Accessories

- Retrofit or replacement: **Adapt-A-Doors**
- Digital thermometers and temperature alarms
- Electrically operated sliding doors
- Hinged reach-in service doors
- Glass display or Vestibule doors
- Reinforced ceiling & floor panels
- Membrane or Sectional roofs
- Modular shelving
- Partitions and door ramps
